

AI Usage DISCLOSURE FORM

1. Team Details

Team Name: _____ Root Cause _____

Project / Product Name: _____ CAPE _____

Organization / Institution (if any): _____ MSRIT _____

Submission Date: _____ 08-05-2026 _____

2. AI Usage Declaration

Did your team use any Artificial Intelligence (AI) in developing this project? Yes / No

_____ Yes _____

3. Purpose of AI Usage (Brief Details)

1. Idea generation / brainstorming _____ Chatgpt was used to brainstorm ideas and claude code was used to get the implementation plan and refine it _____
2. Code generation or assistance _____ Codex was used primarily to make the ai engine.codex was used again to make the APK file _____
3. UI / UX design _____ Stitch was used to design the templates and antigravity to implement them _____
4. Content creation _____ Claude _____
5. Data analysis _____ Codex analyzed the data from various resources which it got from various sources in the android phone _____
6. Testing / debugging _____ Cursor was used for debugging _____
7. Other _____

4. Feature Origin Classification (Please add/delete based on the number of the feature)

1. **Feature Name** Intelligent Context Sensing
 2. **Self-Generated/AI-Generated/Both** Both
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex), OpenClaw docs/README analysis
Prompt used: "List and explain context-aware sensing features for CAPE."
Output summary: Identified calendar, location, usage, sleep, and commute-based sensing signals.
Modification: Consolidated raw signals into one user-facing "Intelligent Context Sensing" feature and simplified wording for report use.
-

1. **Feature Name** AI-Powered Decision Making
 2. **Self-Generated/AI-Generated/Both** Both
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex), OpenClaw integration notes
Prompt used: "Summarize CAPE's AI decision pipeline in feature format."
Output summary: Produced decision flow using OpenClaw agents with context-to-action mapping.
Modification: Reframed technical details into one concise feature for documentation.
-

1. **Feature Name** Stress Scoring
 2. **Self-Generated/AI-Generated/Both** Both
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex), project README/package notes
Prompt used: "Extract stress-related functionality from CAPE architecture."
Output summary: Captured real-time cognitive load estimation from behavioral/context cues.
Modification: Added practical interpretation (decision support for automation packs).
-

1. **Feature Name** Adaptive Learning via Feedback
 2. **Self-Generated/AI-Generated/Both** Both
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex)
Prompt used: "Generate feature text for user-feedback learning loop."
Output summary: Identified feedback submission and recommendation improvement loop.
Modification: Simplified technical pipeline into "continuous personalization" language.
-

1. **Feature Name** Multi-Agent Orchestration
 2. **Self-Generated/AI-Generated/Both** AI-Generated
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex), OpenClaw README
Prompt used: "List orchestration-related capabilities in CAPE/OpenClaw integration."
Output summary: Produced feature where specialized agents handle different context types.
Modification: Merged overlapping points under one orchestration heading.
-

1. **Feature Name** Smart Automation Packs (Focus/Relax/Commute/Home)
 2. **Self-Generated/AI-Generated/Both** Both
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex)
Prompt used: "Convert automation pack list into report-ready feature description."
Output summary: Grouped behavior packs and mapped each to a user scenario.
Modification: Combined four individual modes into one structured feature section.
-

1. **Feature Name** Privacy-First Architecture
2. **Self-Generated/AI-Generated/Both** Both
3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex), README extraction
Prompt used: "Summarize privacy/security features in CAPE."

Output summary: Included local processing, USB bridge communication, no cloud dependency, open-source transparency.

Modification: Polished into compliance/report wording.

1. **Feature Name** Smart Context Transitions
 2. **Self-Generated/AI-Generated/Both** AI-Generated
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex)
Prompt used: "Generate feature statement for automatic transition between contexts."
Output summary: Described auto-detection and smooth behavior switching across locations and routines.
Modification: Added user-benefit framing (reduced manual intervention).
-

1. **Feature Name** Commute Assistance
 2. **Self-Generated/AI-Generated/Both** Both
 3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex), API endpoint mapping
Prompt used: "Extract commute-related capabilities from feature and API sections."
Output summary: Included travel-time awareness, traffic updates, and route suggestions.
Modification: Connected backend API capabilities to end-user feature wording.
-

1. **Feature Name** Gateway API Support
2. **Self-Generated/AI-Generated/Both** AI-Generated
3. **Description (include AI tools/platform Used, prompt used, Output Summary, Modification)**
AI tools/platform used: Cursor IDE (Codex)
Prompt used: "List report-ready backend API features for CAPE gateway."
Output summary: Captured core endpoints for decision, feedback, status, and maps services.
Modification: Reduced endpoint-level detail into concise architecture-feature form.

5. Ethical & Compliance Confirmation

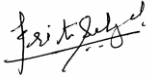

AI usage complies with guidelines and policies. **Yes**

No proprietary or copyrighted data misused. **I Agree**

6. Declaration & Sign-Off

Name of Team Representative: Kriti Sehgal

Role: UI/UX

Signature: 

Date: 08-05-2026
